

## Monitor C-3-RS remote standard, series 3

Dimensions panel (wxhxd): 120x65x40 mm

Material: aluminium

Contains a CSI (charger status interface) and a DC high/low alarm

Easy to install

Will show an occurring charger error on its LED display by means of a code

PN 70403040

### Description

You want to stay in complete control of the situation and have accurate information. Guesswork is not good enough when it comes to the status of your power system.

The Monitor C-3-RS is a remote standard charger control for the Mass & IVO Smart battery chargers. The standard remote control does indicate the status of the charge control by six high power LEDs. In addition to the basic information provided by the C-4-RB basic remote monitor, this C-3-RS standard version also allows the reduction of shore power consumption by means of the charging current adjustment control. Ideal in case of limited shore power. The remote panel can be used as an interface for a custom made panel or for a dual remote indicator. A connection cable is not included.
