Combo ® Model CO29BTP

The manual defrost Combo Ice Maker/Refrigerator model combines maximum ice production with the performance of a high efficiency refrigeration system - all in one compact unit. Maximize your use of space by having both an 18 pound ice maker and 2.1 cubic feet of refrigeration capacity in a single unit.

This black unit is designed with marine applications in mind, featuring a field reversible door with an integrated handle, factory installed travel pin, stainless hinges and mounting hardware. The door also accepts a custom panel to match surrounding cabinets.

PRODUCT HIGHLIGHTS

- Makes lots of ice - fast! An abundant supply of ice cubes in an amazingly short time.
- Manual defrost design produces daily ice rates up to 18 lbs.
- Stores up to 13 lbs.
- Refrigeration capacity of 2.1 cubic feet.
- Only requires 1/4" outside diameter water line connection.
- No drain required, allows for easy and inexpensive installation.
- Corrosive resistant components. Hinges & fasteners are stainless steel to resist corrosion.
- Conserves water, only 2 1/4 gallons of water needed to make approximately 18 lbs. of ice.
